

User Story :

My project is to build a site similar to Instagram where the user expresses his opinions and ideas to everyone

He comments and expresses his opinion on the posts of his friends and others

In this web application the user has to register or login to create his profile.

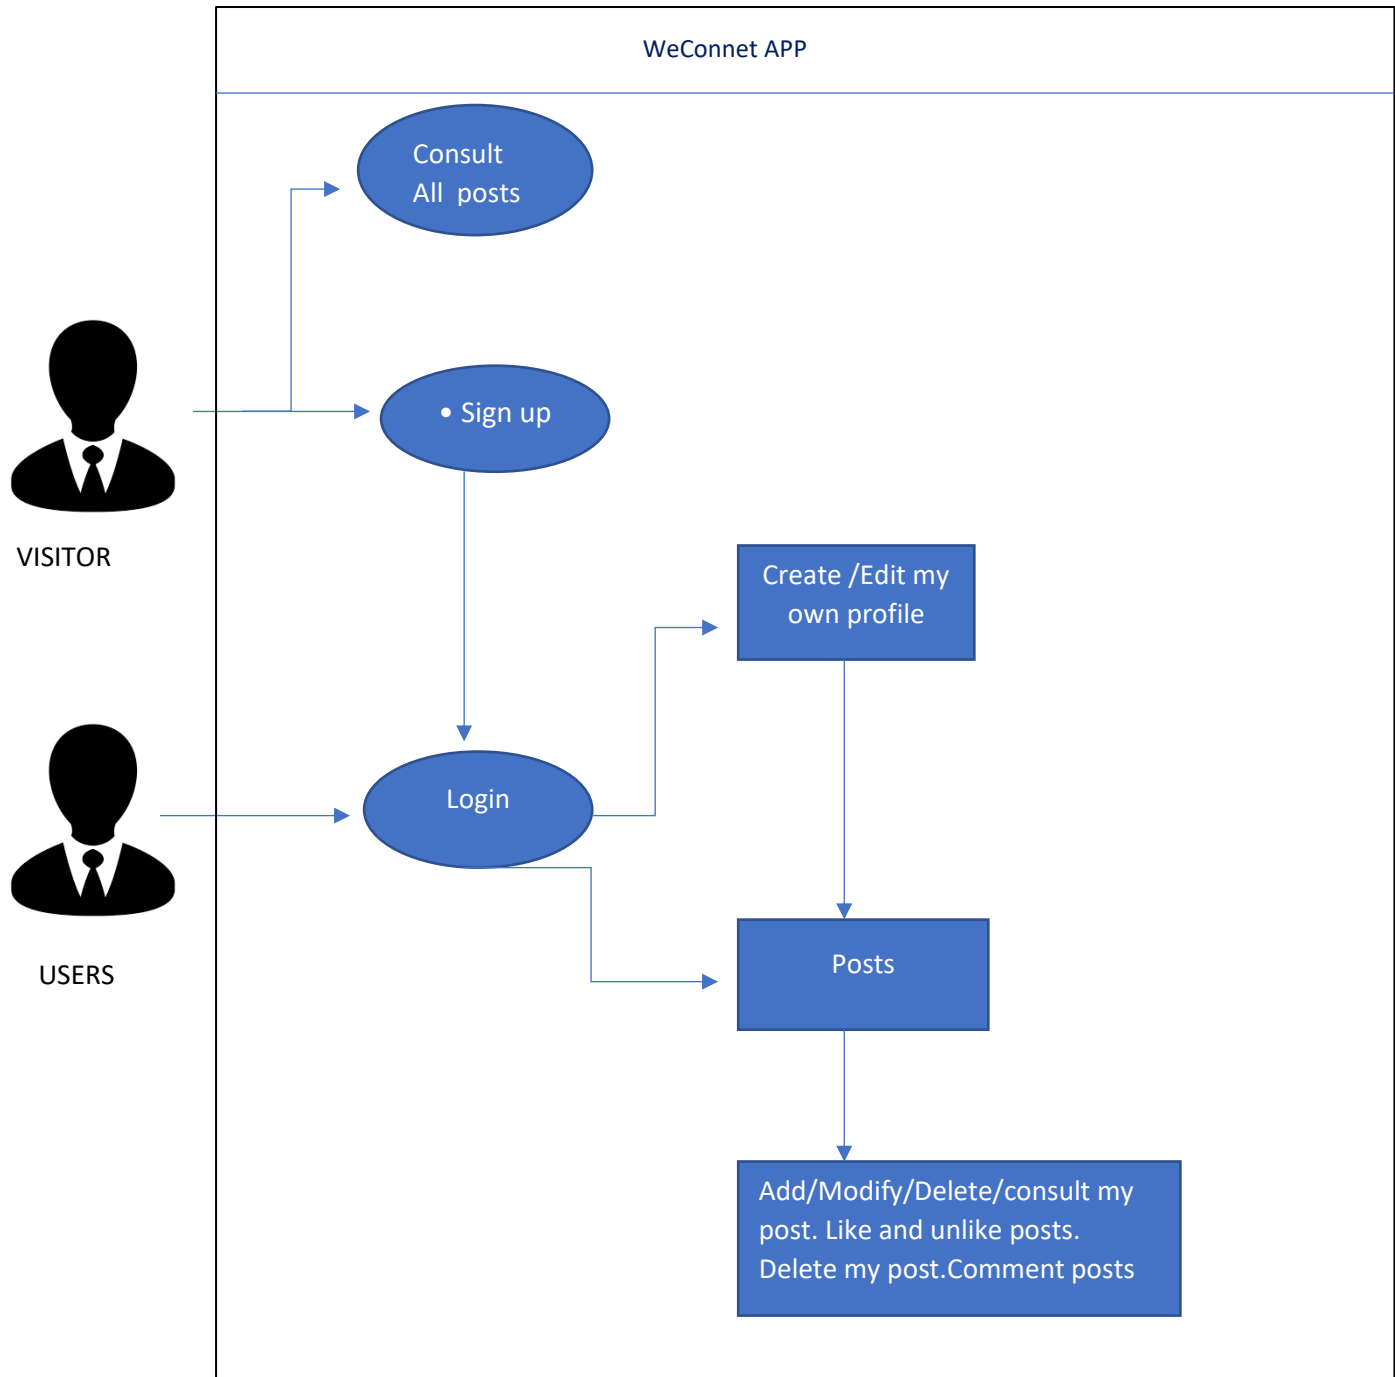

As a visitor I need to:

- Sign up.
- Consult All posts

As a registered user I need to:

- Create my own profile .
- Add my information
- Edit my profile.
- Add/Modify/Delete/consult my post.
- Like and unlike posts.
- Delete my post.
- Comment posts
